

Coding & Solution

Date	12 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/jonnalabunny2005-hash/Credit-Card-Approval-Prediction
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	Flask, Scikit-learn
Key Features Implemented	Data preprocessing, Machine Learning model training, Credit card approval prediction, Flask web application, User-friendly interface
Pending / Incomplete Features	User authentication, Database integration, Cloud deployment
Setup / Run Instructions	1. Install Python and required libraries using pip install -r requirements.txt 2. Run python app.py 3. Open http://127.0.0.1:5000/ in a web browser

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project successfully implements a Machine Learning-based Credit Card Approval Prediction system using Flask. The application is modular, easy to understand, and follows good coding practices. The source code is maintained in a GitHub repository for version control and future enhancements.
