

Scalability & Future Plan

Date	12 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

The Credit Card Approval Prediction system is designed with scalability and future enhancements in mind. The current web-based application can be extended to support a larger number of users, integrate advanced machine learning models, and provide improved security and performance. Future development will focus on increasing prediction accuracy, expanding deployment capabilities, and integrating additional financial analysis features.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset for training	May reduce prediction accuracy for unseen data	High
2	Single machine learning model	Performance may vary for different datasets	Medium
3	Basic user authentication	Limited security for enterprise deployment	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users	Deploy on cloud with load balancing and auto-scaling
2	Data Storage	Static dataset	Integrate cloud database (MySQL/PostgreSQL/MongoDB)
3	Performance	Single model prediction	Optimize model and implement caching for faster responses
4	Security	Basic validation	Add authentication, HTTPS, and role-based access control

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Improve model accuracy using advanced ML algorithms	1 Month	Higher prediction accuracy

Phase 2	Integrate real-time applicant data from financial databases	2 Months	Better decision making
Phase 3	Develop mobile application (Android/iOS)	3 Months	mproved accessibility
Phase 4	Deploy scalable cloud-based solution with enhanced security	4 Months	High availability, security, and scalability
